DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

This $2\frac{1}{2}$ story, midblock house again has the entrance on the right with stoop and vestibule. There are 2 flat arched grilled cellar windows. The upper floor windows in the stone walls have slightly projecting sills and all are one-over-one double hung. The two first floor windows and the entrance with its double doors and transom have an unusual shape. The top side stones curve, as at the springing point of a round arch, but then is interrupted by a short vertical portion, which is capped by a flat splayed arch.

On the second floor is a three paneled (narrow side windows) recessed bay. The cornice line is continuous. There are two massive stone faced hipped dormers both with a large window. The one on the left appears to have its left wall directly over the party wall. There is one small hipped dormer centered between the 2 large ones, but much higher in the roof. It has a pair of 6 pane casements.
